Re: Sampling Event for Bacterial and Fungal Contaminants in Water and on Surfaces (SEL C Project #2007-216)

Dear Mr. Prather,

On June 25, 2007, representatives of Safety Environmental Laboratories and Consulting, Inc. performed a sampling event for the presence of bacterial and fungal contaminants in water and on surfaces at your facility. The following is a summarization of the findings of the sampling event:

Number	Location	Description	Parameter	Concentration
1	Fruit Wash Area	Water	Total Coliform	None Detected
			Fecal Coliform	None Detected
			<i>E. Coli</i>	None Detected
			Fecal <i>Streptococcus</i>	None Detected
2	Conveyor Belt	Surface Swab	Viable Fungi	None Detected
3	Fruit Wash Area	Surface Swab	Total Coliform	None Detected
			Fecal Coliform	None Detected
			<i>E. Coli</i>	None Detected
			Fecal <i>Streptococcus</i>	None Detected

All samples were collected by representatives of Safety Environmental Laboratories and Consulting, Inc. in Birmingham, Alabama. Laboratory analysis was provided by EMSL Analytical in Westmont, New Jersey.

SEL C appreciates the opportunity to have provided you with these services. If you have any questions or desire assistance in the future, please feel free to contact me at (205) 823-6200.

Thank you,

Shannon Sutton, CIH, CHMM
Vice-President/Technical Director
